DETAILED ACTION

Response to Amendment

The amendment filed on 2/23/06 has been accepted.

Allowable Subject Matter

Claim 4 –9 are allowed.

The following is an examiner's statement of reasons for allowance:

With regards to claim 4 and 7, the prior art of record does not teach or suggest a radiation image storage panel wherein the flattening process for the surface of the stimuable phosphor layer is filled with a material exhibiting a refractive index larger than 1, into depressed regions of the surface thereby flattening the stimuable phosphor layer. References like Joly et al. (US Pub. 2003/0168611 A1) teach a binderless stimuable phosphor screen comprising a phosphor layer, wherein the vapor deposited phosphor is needle-shaped with voids between the needles, in which the voids are partially filled with a polymeric compound. However, Joly fails to specify completely filling the voids thereby not flattening the stimuable phosphor layer. As such, applicant's disclosure provides a novel and nonobvious improvement over the prior art.

Claims 5, 6, 8 and 9 are allowed by virtue of their dependencies on claims 4 and 7.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
